

# Insert Fancy Project Title

Joseph George, Tammer Haddad

Northeastern University, Boston, 02115

December 1, 2025

## Abstract

Your abstract goes here. A well-written abstract introduces the problem and motivation (briefly), highlights the approach taken by the authors, and summarizes the results. The idea is to give the readers an overview of what to expect from the paper.

**Keywords**— one, two, three, four

## Introduction

The introduction section serves to expand upon the motivation, and to contextualize the specific problem chosen by the authors to work upon. In the absence of a dedicated related work section, comparison to previous approaches may be highlighted here. The section discusses the approach at a high-level, often with supporting figures where appropriate. The following is an example of how to insert an image in Latex.

Figure 1: A cool graph. This image does not reflect the author's allegiance to the DC Comics universe.

Here, I refer to Figure 1 without actually listing the actual figure number in plaintext!

## 1 Example Section

This is an example of a numbered section. Sections typically seen in a research paper are Related Work, Preliminaries, Data, Methodology, Experiments, Results, and Discussion. The order in which these sections appear may depend on the venue.

### 1.1 Example Subsection

This is an example of a subsection. For example, Definitions could be a subsection of the Preliminaries section.

## 2 Formulae, Tables

### 2.1 Typing Equations in L<sup>A</sup>T<sub>E</sub>X

This subsection demonstrates the use of inline formulae, like  $e = mc^2$ , or equations like the one below on a separate line.

$$\int_a^b x^2 \, dx = \frac{1}{3}x^3 \Big|_a^b$$

For numbered equations, we use the *equation* environment:

$$\int_a^b x^2 \, dx = \frac{1}{3}x^3 \Big|_a^b \tag{1}$$

### 2.2 Tables

This subsection demonstrates the use of tables in a L<sup>A</sup>T<sub>E</sub>Xdocument. Resources like [tablesgenerator.com](#) can be used to generate code for tables like the one below.

Here, I refer to Table 1 without actually listing the actual Table number!

References to books [?] or articles [?] can be made like this, with the full citations defined in a *.bib* file.

## 3 Github Link & Team Contributions

Please include a link to your GitHub repo and a 65-word (total) statement summarizing each member's contributions.
